EDUCATION

_nology, Bristol

June 2019 - September 2019

Finally deciding to go back to coding I enrolled on _nology, a Front-end development bootcamp. Here I spent 3 months coding full time. The tech stack I worked on is the following:

- HTML
- CSS
- SCSS
- JavaScript
- React
- Firebase
- TDD with Jest and Enzyme

Using this tech stack, me and the other students worked together on a client project. You can find what we built at <https://app.hedira.io>.

To work on this project, we did pair programming and learnt about the Agile methodology.

University of Huelva, Huelva: *Computer Science*

2013 - 2016

This degree was my first introduction to code. Here I learned to code in C, C++ and Java and worked on some projects in Python by myself. I was also introduced to SQL and relational databases in general.

I started the degree thinking I would come out of it a developer. Unfortunately, there were a lot of subjects I wasn't so interested in. Eventually I decided the way that university was teaching didn't work for me.

EXPERIENCE

Everyman, Bristol, UK: *Team Leader*

June 2017 - Present

La Bodeguita, Vejer de la Fra, Spain: *Bartender*

June 2015 - February 2017

After leaving university, I went to work on hospitality full time to support myself. This experience gave me stronger team and social skills as well as tested me in my problem solving ability in a fast paced scenario.

SKILLS

HTML, CSS, SCSS, JavaScript, TDD, React and Firebase.

SECONDARY SKILLS

Exposure to TypeScript, C++, Python, Java and SQL

TRANSFERABLE SKILLS

Customer service and communication.

Ability to work in a fast paced environment.

Problem solving.

Ability to multitask and coordinate between meeting different deadlines.

LANGUAGES

English: *fluent. Written and spoken.* - C1 CAE 2017

Spanish: *native.*

OTHER INTERESTS

Apart from enjoying all things tech, I also enjoy music and playing guitar to be more precise.

Shooting a bow and arrow is also something I'm known to do.
